

FELIX GOODMAN

COMPUTER SCIENCE STUDENT

EXPERIENCE

Work Experience

MediVet

During April 2014, I worked as an assistant in MediVet veterinary surgery in Borehamwood. In this, I had the following responsibilities:

- Preparation of animal enclosures
- Organisation of medical equipment and medicines
- Sterilisation of surgical utensils
- Setting up the operating room

Volunteering

National Citizenship Service

Whilst doing my National Citizenship Service placement, my team and I carried out fundraising events for the Herts Young Homeless charity. These included running winter charity stalls on market days, as well as organising and managing a bake sale where we aimed to raise money and inform the public of the charity's mission. To help raise awareness, we also designed and distributed leaflets with information about the Charity and its cause. This taught me the value of effective communication and team management within an ongoing project.

Award

Duke of Edinburgh - Bronze Award

Through my Duke of Edinburgh placement, I did the following as constituent activities for the award:

- Completed an additional GCSE in Astronomy
- Completed my third consecutive year representing my schools as a prefect, where I was also an audio technician for morning assemblies
- Prepared the equipment for, managed, and helped coach lower school badminton lessons
- Set out with a six-man team on a two-day hiking expedition in The New Forest National Park, Hampshire. In this, I assisted in navigation towards pre-defined checkpoints by time deadlines. This brought us the challenge of having to make important decisions on which routes to take in time-pressured situations. This showed me the importance of having a balanced and level-headed approach to oncoming problems.

EDUCATION / QUALIFICATION

Current Course

University of Nottingham - Computer Science | 2017 - 2021 First Year Grade: First

I am currently on my second year at The University of Nottingham studying a four year BSc in Computer Science with an Industry Year.

- Experienced in end-to-end web system development
- Excelled in a broad range of first-year modules including Systems and Architecture, Artificial intelligence and Software Engineering

Course Studied

Verulam School | September 2010 - June 2017

A Levels in Computer Science (A), Biology (B) and Chemistry (B)

AS Level in Religious Studies (A)

IFS Finance Certificate (A)

12 GCSEs 6A's, 5B's and 1C

ABOUT

I am a highly organised and focussed individual with a keen eye for detail and a dedication to work I've been set. I am currently on my second year at The University of Nottingham, studying Computer Science, and I am on track for a first grade. My career interests including research and development, artificial intelligence, cybersecurity and hardware design. I am currently looking to further my computing knowledge and gain practical workplace experience within a team in cybersecurity, software engineering and systems design.

PROGRAMMING

HOBBIES

- Archery
- Motorsports
